

Quick Start Guide

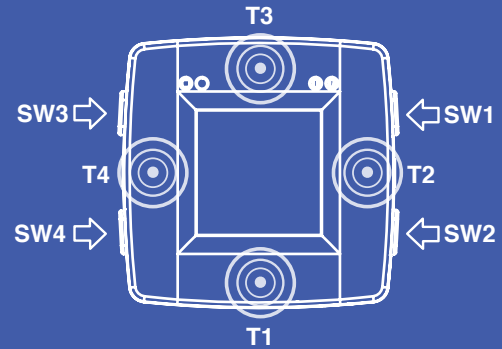

■ 1 Power Rapid IoT

Supply power using the provided micro-USB cable.

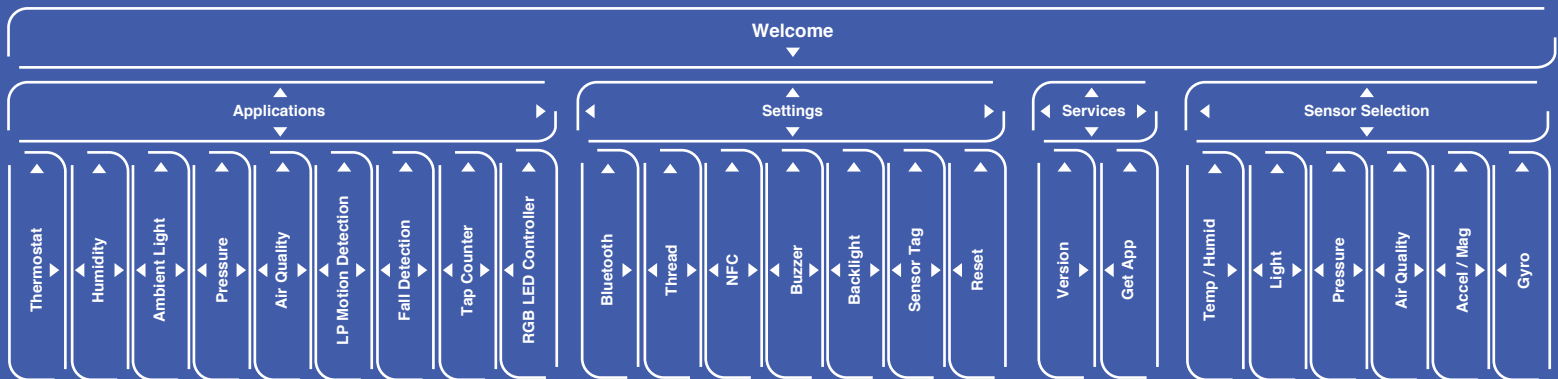

■ 2 Control Rapid IoT

Use **TOUCH Buttons (Tx)** to navigate and use **PUSH Buttons (SWx)** to interact with the preloaded applications.

■ 3 Play with the default application

■ 4 Connect Rapid IoT

- Download the NXP Rapid IoT phone App from the iOS and Android App stores.
- Use the App to connect Rapid IoT over Bluetooth.
- Monitor and control Rapid IoT from the Cloud.

■ 5 Go Online

Create your own IoT application! Documentation, instructions, videos, examples and free software available at: www.nxp.com/rapid-iot

Happy?

If you don't know how to share your satisfaction, here a few suggestions.

Tell your colleagues and friends.

Connect with us on NXP Twitter and Facebook.
