

N2744A T2A Probe Interface Adapter

Data Sheet

Key Features

- Enables TekProbe-BNC™ level II probes to connect to Agilent's AutoProbe interface on InfiniiVision 3000X, 5000, 6000, 7000 and Infiniium 9000, 90000 oscilloscopes
- An easy-to-use plug-on adapter to the Agilent oscilloscope's AutoProbe interface
- Provides necessary probe power, offset control and calibration as needed to the attached TekProbe probe

The N2744A T2A interface adapter enables selected Tektronix TekProbe interface level II probes to be used with Agilent oscilloscopes with the AutoProbe interface. Existing TekProbe-BNC probe types can simply be plugged into the T2A adapter which is then plugged directly into any AutoProbe input channel on an InfiniiVision or Infiniium oscilloscope. Select the probe model in the scope menu and the Agilent oscilloscope sets up the attenuation factor and the probe type automatically. The T2A interface adapter supplies the necessary probe power and offset control as used by the connected TekProbe probe. The adapter is targeted for customers using both Tek active probes with TekProbe-BNC level II interfaces and Agilent oscilloscopes with the AutoProbe interface.
