

Agilent Signal Simulation Test System Z2090B-032

System Overview

System Capability

- RF signal generation for 50 MHz to 20 GHz
- Individual and combined RF carriers
- Spectrum Analysis and Vector Signal Analysis capabilities
- RF Power measurement capability to 26 GHz

System Software

The system comes with standard Agilent instrument drivers, measurement firmware depending on instrument options selected, Win XP Pro™ operating system, and Norton Ghost™.

System Hardware

- Two Agilent E8267D 20 GHz Performance Signal Generators with built in AWG capability
- Agilent E4440A Spectrum Analyzer
- Two Agilent N1912A RF Power Meters with wide band power sensors
- RF switch and signal conditioning chassis
- Internal 10 MHz reference distribution
- System rack, cabling, and industrial PC
- Modular DC power supply

Rack Hardware

- Agilent 1.6meter or 3rd party ruggedized rack, PDU and cooling

System Description

The Z2090B-032 Signal Stimulator Test Set (SSTS) provides generation and measurement of two individual and/or combined RF signals which are routed to one of four RF outputs. The RF signals are generated by two Agilent vector PSG signal generators which are capable of generating RADAR and communications signals from 50 MHz to 20 GHz. Measurement capability is provided by an Agilent PSA signal analyzer and an Agilent RF power meter.

Agilent will tailor the system to specific customer needs

Any test system is only as good as its capability to test the specific UUT. Agilent has the expertise, resources and processes in place to match the system to your needs. Our experience along with that of selected partners will ensure that your testing needs are fully met in a cost competitive manner.

System Functional Block Diagram

System Benefits

- This system solution provides a single part number with capability to supply RF stimulus and perform measurements for multiple channel communication and radar products
- SSTS is a platform solution that can be customized to specific requirements.

Warranty & Support

Agilent provides a 1-year return-to-Agilent warranty on custom systems. Warranty extensions and custom repair strategies are available to meet your specific requirements.

Agilent Technologies aims to maximize the value you receive, while minimizing your risk and problems. We strive to ensure that you get the test and measurement capabilities you paid for and obtain the support you need. Our extensive support resources and services can help you choose the right Agilent products for your applications and apply them successfully. Every instrument and system we sell has a global warranty. Support is available for at least five years beyond the production life of the product. Two concepts underlie Agilent's overall support policy: "Our Promise" and "Your Advantage."

Our Promise

Our Promise means your Agilent test and measurement equipment will meet its advertised performance and functionality. When you are choosing new equipment, we will help you with product information, including realistic performance specifications and practical recommendations from experienced test engineers. When you use Agilent equipment, we can verify that it works properly, help with product operation, and provide basic measurement assistance for the use of specified capabilities, at no extra cost upon request. Many self-help tools are available.

Application Assistance

Agilent's application experts are available to help optimize the system, taking full advantage of the system capability for your unique application. Operator training is also available to help you get the system into service quickly.

If your application goes beyond the standard system offering described above, Agilent program managers and engineering professionals can help define and implement unique functionality. They ensure that your custom system requirements are implemented successfully.

Agilent Email Updates

LXI is the LAN-based successor to GPIB, providing faster, more efficient connectivity. Agilent is a founding member of the LXI consortium.

Agilent Channel Partners

www.agilent.com/find/channelpartners

Get the best of both worlds: Agilent's measurement expertise and product breadth, combined with channel partner convenience.

Remove all doubt

Our repair and calibration services will get your equipment back to you, performing like new, when promised. You will get full value out of your Agilent equipment through-out its lifetime. Your equipment will be serviced by Agilent-trained technicians using the latest factory calibration procedures, automated repair diagnostics and genuine parts. You will always have the utmost confidence in your measurements. For information regarding self maintenance of this product, please contact your Agilent office.

Agilent offers a wide range of additional expert test and measurement services for your equipment, including initial start-up assistance, onsite education and training, as well as design, system integration, and project management.
