

Photoelectrics Diffuse-reflective Type PD30CND10....DU

CARLO GAVAZZI

- Miniature sensor range
- Range: 1 m
- Sensitivity adjustment by Teach-In programming
- Modulated, red light 660 nm
- Supply voltage: 10 to 30 VDC
- Output: 100 mA, NPN or PNP preset
- Make or break switching function programmable
- LED indication for output, stability and power ON
- Protection: reverse polarity, short circuit and transients
- Cable and plug versions
- Excellent EMC performance
- Dust alarm output

Product Description

The PD30CND10 sensor family comes in a compact 10 x 30 x 20 mm reinforced PMMA/ABS housing. The sensors are useful in applications where high-accuracy detection as well as small size is required. Compact housing and high power LED for excellent performance-size ratio.

The Teach-In function for adjustment of the sensitivity makes the sensors highly flexible. The output type is preset (NPN or PNP), and the output switching function is one NO or NC output and one dust output NO or NC.

Ordering Key

PD30CND10PPM5DU

Type	_____
Housing style	_____
Housing size	_____
Housing material	_____
Housing length	_____
Detection principle	_____
Sensing distance	_____
Output type	_____
Output configuration	_____
Connection type	_____
Dust Output	_____

Type Selection

Housing W x H x D	Range S _n	Connection	Ordering no. NPN Make or break switching	Ordering no. PNP Make or break switching
10 x 30 x 20 mm	1 m	Cable	PD 30 CND 10 NPDU	PD 30 CND 10 PPDU
10 x 30 x 20 mm	1 m	Plug	PD 30 CND 10 NPM5DU	PD 30 CND 10 PPM5DU

Specifications

Rated operating distance (S_n)	Up to 1 m, reference target Kodak test card R27, white, 90% reflective, 200 x 200 mm	Protection and transients	Short-circuit, reverse polarity
Blind zone	20 mm	Light source	GaAlAs, LED, 660 nm
Sensitivity	Adjustable by Teach-In	Light type	Red, modulated
Temperature drift	≤ 0.1%/°C	Sensing angle	± 2°
Hysteresis (H) (differential travel)	≤ 10%	Ambient light	10,000 lux
Rated operational volt. (U_B)	10 to 30 VDC (ripple included)	Light spot	110 mm @ 1.5 m
Ripple (U_{rpp})	≤ 10%	Operating frequency	1000 Hz
Output current Continuous (I _a) Short-time (I)	≤ 100 mA ≤ 100 mA (max. load capacity 100 nF)	Response time OFF-ON (t _{ON}) ON-OFF (t _{OFF})	≤ 0.5 ms ≤ 0.5 ms
Dust output current Continuous (I _a) Short-time (I)	≤ 20 mA ≤ 20 mA (max. load capacity 100 nF)	Power ON delay (t_v)	≤ 300 ms
No load supply current (I_o)	≤ 30 mA @ 24 VDC	Output function NPN and PNP Output configuration Programming options	Preset NO or NC Output pin 4 black Output pin 2 white
Minimum operational current (I_m)	0.5 mA	Dust alarm output Delay on operate	NO or NC NO or NC (dust) 20 ms
OFF-state current (I_r)	≤ 100 μA	Indication Output ON Signal stability ON and power ON	LED, yellow LED, green
Voltage drop (U_d)	≤ 2.4 VDC @ 100 mA		

Specifications (cont.)

Environment		Rated insulation voltage	
Installation category	III (IEC 60664/60664A; 60947-1)	500 VAC (rms)	
Pollution degree	3 (IEC 60664/60664A; 60947-1)	Housing material	
Degree of protection	IP 67 (IEC 60529; 60947-1)	Body	ABS
Ambient temperature		Front material	PMMA, red
Operating	-25° to +55°C (-13° to +131°F)	Connection	
Storage	-40° to +70°C (-40° to +158°F)	Cable	PVC, black, 2 m 4 x 0.14 mm², Ø = 3.3 mm M8, 4-pin (CON. 54-series)
Vibration		Plug	
10 to 55 Hz, 0.5 mm/7.5 g (IEC 60068-2-6)		Weight	With cable: 40 g With plug: 10 g
Shock		CE-marking	Yes
30 g / 11ms, 3 pos, 3 neg per axis (IEC 60068-2-6, 60068-2-32)		Approvals	cULus (UL508)

Installation Hints

Delivery Contents

- Photoelectric switch: PD 30 CND 10 ...
- Installation instruction
- Mounting bracket APD30-MB1
- **Packaging:** Cardboard box

Accessories

- Mounting bracket APD30-MB2 to be purchased separately

Teach functions

Normal operation, optimized switching point.

1. Line up the sensor at the background. Yellow LED is OFF and Green LED is ON.
2. Press the button for 3 seconds until both LEDs flashes simultaneously.
(The first switch point is stored)
3. Place the object in the detection zone.
4. Press the button once and the sensor is ready to operate (Green LED ON, Yellow LED ON)
(The second switch point is stored)

For dynamic set-up (running process)

1. Line up the sensor at the object. Green LED is ON, status on the yellow LED is not important.
2. Press the button for 3 second until both LEDs flashes simultaneously.
3. Press the button a second time for at least one second, both LED's flashes fast simultaneously and keep the button pressed for at least one process cycle, release the button and the sensor is ready to operate (The second switch point is stored)

For maximum sensing distance (default setting)

1. Line up the sensor at the background. Yellow LED is OFF and Green LED is ON.
2. Press the button for 3 seconds until both LEDs flashes simultaneously.
(The first switch point is stored)
3. Press the button a second time and the sensor is ready to operate (Green LED ON, Yellow LED ON)
(The second switch point is stored)

For make or break set-up (N.O. or N.C.)

1. Press the button for 10 seconds, until the green LEDs flashes.
2. While the green LED flashes, the output is inverted each time the button is pressed. Yellow LED indicates N.O. function selected.
If the button is not pressed within the next 10 seconds, the current output is stored.

For minimum sensing distance

1. Line up the sensor at the object. Yellow LED is ON and Green LED is ON.
2. Press the button for 3 seconds until both LEDs flashes simultaneously.
(The first switch point is stored)
3. Press the button a second time and the sensor is ready to operate (Green LED ON, Yellow LED ON)
(The second switch point is stored)

For dust output (N.O. or N.C.)

1. Press the button for 15 seconds, until the yellow LEDs flashes.
2. While the yellow LED flashes, the dust output is inverted each time the button is pressed. Green LED indicates N.O. function selected.
If the button is not pressed within the next 10 seconds, the current output is stored.
