Product Description

The SOLITRON Power is a single-phase Solid State Contactor designed to replace electro-mechanical contactors in industrial heating and motor applications. This product can cope with frequent switching of high current loads. The product is ready to mount on DIN-rail or chassis and comes with integral heatsink. For current rating of 90 AACrms (AC51) convection cooling is used. The terminal layout

allows both contactor (E) and SSR (U) type connection. Cage clamp terminals are used to ensure secure load connection with cable up to 25mm².

An LED indicates the status of the control input. The superior heat-transfer efficiency combined with a robust power management system make this a high reliability product that can meet the most stringent functional requirements.
