

Get the Big Picture!

Enlarge PC Images on Any TV

- **Business:** Enhance your presentation and captivate your audience with compelling multimedia content. Use MediaShow to easily incorporate PowerPoint slides, video files, images and graphics into a winning multimedia show.
- **Education:** Make a difference in the classroom: Research studies indicate that students learn up to 30% faster when lesson plans include multimedia content. Use the big-screen TV to capture student attention and create an effective learning environment.
- **Entertainment:** Turn your PC into an interactive family experience. Bring the family together around the big-screen to enjoy watching DVD movies, surfing the Internet and playing PC games.
- **On the Go:** Ideal for mobile users. Convenient, lightweight, and affordable alternative to projectors.
