

AITech ProPC/TV Wireless

Now you can wirelessly display your PC's VGA video and audio to a TV set, or other display device at up to 100 feet away!

AITech introduces its next generation wireless PC to TV converter. The ProPC/TV Wireless displays at up to 2048x1536 resolution on your TV set at refresh rates of up to 150Hz! ProPC/TV Wireless makes it easy for you to wirelessly connect your desktop, laptop, or Media Center PC to a TV located up to 100 feet away in your home, school or office environment.

There are so many uses for the ProPC/TV Wireless, you are only limited by your imagination as to its varied uses and applications.

- Display company presentations from your notebook computer to the boardroom TV set.
- Send a welcome greeting from your office computer to a TV in your lobby for arriving guests.
- Display high-quality PowerPoint and educational presentations in the classroom.
- Play a DVD from your home office PC to the living room TV set.
- With your IR keyboard/mouse, play video games from a PC located in an upstairs bedroom, to the downstairs living room TV.
- Monitor your children's Internet activities from a TV in any room in the house.
- With additional receivers, send audio and video to multiple TVs.
