

GENERAL DESCRIPTION

The M692SDM is a single frequency/single output SAW-based VCSO for low-jitter clock generation. The M692SDM incorporates an analog X2 frequency multiplier to provide an output frequency that is twice that of the fundamental VCSO frequency.

FEATURES

- ◆ Integrated SAW device
- ◆ Low phase jitter: 250fs rms typical for the M692SDM (20kHz to 20MHz)
- ◆ Output frequency: 1747 MHz Typ.
(Specify center frequency at time of order)
- ◆ Single-ended RF Output
- ◆ Single +5V power supply
- ◆ 13 x 20mm SMT (surface mount) package
- ◆ +10°C to +85°C operating temperature
- ◆ Pb-free / Compliant to EC RoHS Directive (RoHS 5/6)
