MC14598B

8-Bit Bus-Compatible Latches

The MC14598B is an 8−bit latch addressed with an external binary address. The 8 latch−outputs are high drive, three−state and bus line compatible. The drive capability allows direct applications with MPU systems such as the Motorola 6800 family.

The latches of the MC14598B are accessed via the Address pins, A0, A1, and A2.

All 8 outputs from the latches are available in parallel when $\overline{\text{Enable}}$ is in the low state. Data is entered into a selected latch from the Data pin when the Strobe is high. Master reset is available on both parts.

Features

- Serial Data Input
- Three−State Bus Compatible Parallel Outputs
- Three−State Control Pin ($\overline{\text{Enable}}$) TTL Compatible Input
- Open Drain $\overline{\text{Full}}$ Flag (Multiple Latch Wire−O Ring)
- Master Reset
- Level Shifting Inputs on All Except $\overline{\text{Enable}}$
- Diode Protection — All Inputs
- Supply Voltage Range — 3.0 Vdc to 18 Vdc
- Capable of Driving TTL Over Rated Temperature Range With Fanout as Follows: 1 TTL Load
  4 LSTTL Loads
- Pb−Free Package is Available*

MAXIMUM RATINGS (Voltages Referenced to V_{SS})

Parameter	Symbol	Value	Unit
DC Supply Voltage Range	V_{DD}	−0.5 to +18.0	V
Input Voltage Range, enable (DC or Transient)	V_{in}	−0.5 to V_{DD} +0.5	V
Input Voltage Range, all Other Inputs (DC or Transient)	V_{in}	−0.5 to V_{DD} +12	V
Output Voltage Range, (DC or Transient)	V_{out}	−0.5 to V_{DD} +0.5	V
Input or Output Current (DC or Transient) per Pin	I_{in}, I_{out}	±10	mA
Power Dissipation per Package (Note 1)	P_D	500	mW
Ambient Temperature Range	T_A	−55 to +125	°C
Storage Temperature Range	T_{stg}	−65 to +150	°C
Lead Temperature (8−Second Soldering)	T_L	260	°C

Stresses exceeding Maximum Ratings may damage the device. Maximum Ratings are stress ratings only. Functional operation above the Recommended Operating Conditions is not implied. Extended exposure to stresses above the Recommended Operating Conditions may affect device reliability.

1. Temperature Derating: Plastic “P and D/DW” Packages: – 7.0 mW/°C From 65°C To 125°C

*For additional information on our Pb−Free strategy and soldering details, please download the ON Semiconductor Soldering and Mounting Techniques Reference Manual, SOLDERRM/D.

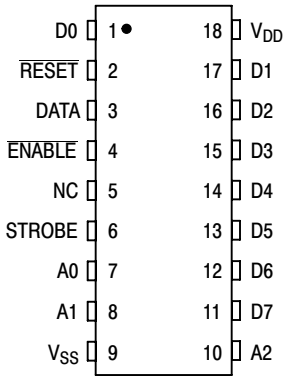
ORDERING INFORMATION

Device	Package	Shipping
MC14598BCP	PDIP−18	20 Units/Rail
MC14598BCPG	PDIP−18 (Pb−Free)	20 Units/Rail

This device contains protection circuitry to guard against damage due to high static voltages or electric fields. However, precautions must be taken to avoid applications of any voltage higher than maximum rated voltages to this high−impedance circuit. For proper operation, V_{in} and V_{out} should be constrained to the range $V_{SS} \le (V_{in}$ or $V_{out}) \le V_{DD}$.

Unused inputs must always be tied to an appropriate logic voltage level (e.g., either V_{SS} or V_{DD}). Unused outputs must be left open.

PIN ASSIGNMENT



BLOCK DIAGRAM
