Product Description

This module is a 1x2 switch module intended to address WiMAX, WiFi, and Cellular 700 MHz to 2.7 GHz, 3.3 GHz to 3.8 GHz applications. This switch is specified to be capable of supporting linear power levels over 1 watt. The small form factor and integrated DC blocking minimizes the layout size and reduces the number of external components. The device is provided in a 4mm x 4mm x 0.9 mm LGA package. This module meets or exceeds the RF Front End needs of IEEE802.11b/g/n and IEEE802.16 systems.
