

For 424, 428, 824 & 828 Series Modules

Single Channel Filter Mounting Assembly

Description

The FMA-02A is a filter mounting assembly that eliminates the need to breadboard or hand-wire filter modules into individual test set-ups. The FMA-02A is a factory assembled 3" x 5" printed-circuit board with socket pins for filter insertion, various electronic components, and screw terminal connections for power and signal input/output. FMA-02A's will operate any of the low-pass, high-pass, band-pass or notch 424, 428, 824 and 828 series filter modules.

Features/Benefits:

- No more building of breadboards.
- Utilized as a single channel bench-top test set or rack mounted via mounting holes for instrumentation applications.
- Accepts a broad range of programmable filter modules allowing for selected cut-off frequencies and transfer functions specific to each application.
- Provide quick and easy connection between circuit card and wired electrical circuits.
- All external connections are easily made with a screwdriver, reducing engineering design, set-up and test time.

Applications

- Aerospace, navigation, sonar applications
- ATE, research and development
- Automotive and transportation
- Communication systems and electronics
- Data acquisition systems
- Industrial process control
- Medical electronics equip. and research
- Sound and vibration testing
- Noise elimination
- Signal reconstruction

Low-Pass Filters Available

424	4-pole	10.0 Hz to 102.4 kHz
824	4-pole	1.00 Hz to 102.4 kHz
428	8-pole	10.0 Hz to 102.4 kHz
828	8-pole	1.00 Hz to 102.4 kHz

High-Pass Filters Available

424	4-pole	10.0 Hz to 102.4 kHz
824	4-pole	1.00 Hz to 102.4 kHz
428	8-pole	10.0 Hz to 102.4 kHz
828	8-pole	1.00 Hz to 102.4 kHz

Band-Pass Filters Available

824BP	2-pole pair	1.00 Hz to 102.4 kHz
828BP	4-pole pair	1.00 Hz to 102.4 kHz

Band-Reject (Notch) Filters Available

828BR	4-pole pair	1.00 Hz to 102.4 kHz
