

iW-RainboW-G3 is a novel design based on Freescale's i.MX27 Processor, first of its kind, that enables the development of various state of the art Multimedia products. This flexible and cost effective design is boon for the rapidly growing consumer and enterprise markets. Product developers need the elemental flexibility to reach their aggressive targets, without compromising on development time, cost, power and form-factor. This generic feature rich design is targeted to OEMs/ODMs, who can adopt this design and bring out an innovative, cost-effective products like Digital Video Recorder, Video Phone, Wi-Fi IP/ Rear View Camera, IPTV, Healthcare PDA, Industrial Handheld, Digital Signage or any portable computing application within a short period of time for various applications.
