### Introducing the AXSUN 1060 nm OCT Swept Source

To meet the design challenges of next-generation Optical Coherence Tomography systems, Axsun Technologies introduces a unique, patented Swept Source OCT Engine with superior optical performance, in a compact and cost-effective package.

### Product Description

The AXSUN 1060 nm swept source provides high power, wide tuning range, and unprecedented sweep speed and coherence length, in a convenient bench-top design, controllable with an optional USB interface.

### Unique Laser Design

Based on AXSUN Technologies' *optical integration* platform, and patented MEMS tunable optical filter, the Axsun swept source enables real time, high resolution OCT imaging at speeds and price points that were previously unattainable.

### Speed & Reliability

The industry's highest speed Swept Source is enabled by a patented MEMS tunable filter design that has logged over 500 Million device hours in Optical Networks around the world since 2001. Axsun's optical platform has a well-deserved reputation for high reliability.

### Convenient Form Factor

The Axsun Swept Source Engine resides in a compact (208 x 152 x 76 mm) housing and is straightforward to set up and evaluate. The universal AC Power adaptor, simple key on/off switch and optional USB interface allow the user to begin collecting data in a matter of minutes.
