DVDO AIR™

DVDO Air™ Wireless for HDMI® Connection System: Send High Definition Signals to DTV for a Clean Look Without Wires

Get the clean look of a wall mounted DTV without the wires! If your home entertainment equipment — cable/satellite box, Blu-ray Disc™ player, DVD, AVR, etc. — is located away from the DTV screen, DVDO Air™ will make this placement incredibly easy. Best of all, there won't be any unsightly wires connected to the DTV. The wireless DVDO Air system transfers full, uncompressed HD video and audio, so you can watch Blu-ray movies and enjoy full 7.1 channel surround sound flawlessly. It looks and sounds exactly the same as it would with a high-performance cable, except there's no cable, just DVDO Air!

Easy Connection Solution Hides the Cable

Wall mounted DTVs look best without cables dangling. How do you do it without installing hidden wires? The DVDO Air wireless connector transfers HD signals from cable DTV and satellite boxes, Blu-ray, DVRs, AVRs, notebook PCs and other devices to your DTV. The wireless receiver mounts on the DTV (exclusive DVDO Air clip included!) or on the wall. Whether sending signals just a few feet, or throughout a large room, DVDO Air delivers perfect picture and sound while eliminating unsightly cables.

Full HDMI DTV Connection

HD Wireless systems are not all the same. Some compress the HD signal and some don't work with all HDMI features. DVDO Air is fully

HDMI compliant, capable of delivery of HD video, 7.1 surround sound, and CEC. DVDO Air also integrates with DVDO Duo and EDGE Green switching and scaling components for full HDMI compliance throughout.

60 GHz Technology for Zero Interference

The DVDO Air 60-GHz wireless technology achieves the highest performance coupled with interference-free operation. Since other wireless devices such as mobile phones, cordless phones and Wi-Fi networks use much lower frequency radio signals (under 6 GHz) there's no interference. With DVDO Air, your home will be in wireless harmony.

All-Inclusive System for All Homes

Whether you have a high-end home theater or a basic setup, DVDO Air is the right solution for you. Performance-wise the competitively priced DVDO Air is top-tier, delivering the ideal picture and sound quality without compromise. DVDO Air is designed to work with other DVDO high-performance home theater components—including DVDO Duo and EDGE Green — so there are no redundant features, which helps save you money.

DVDO AIR™

Wireless for HDMI Connection System

KEY FEATURES:

- Connects any HD source (Blu-ray, cable or satellite box, notebook PC, audio/video receiver, DVR) to a DTV without any wires between them.
- Full HDMI compliance includes HD video and Consumer Electronics Control (CEC), which enables the DTV remote to control the source device (if source and TV are CEC compliant). It's HDCP compliant as well.
- 60 GHz wireless technology provides bandwidth for full 1080p uncompressed video with 7.1 surround sound.
- Easy installation — just connect transmitter to source, and receiver to a DTV.
- No interference with other wireless devices, which use much lower frequencies.
- Exclusive DVDO Air receiver mounting clip attaches to wall or to top of DTV, maximizing range and making installation easy.
- Part of DVDO's tightly integrated home theater component line, including Duo and EDGE Green.

Product Name: DVDO Air

Manufacturer: DVDO, Inc.

Brand Name: DVDO

Manufacturer Part Number: DVDOAir-P

Master Pack: 10 units

UPC Code: 880802000053

L x W x H: 9.5"x8"x3"

Weight: 2 lbs

ALL-IN-ONE SOLUTION INCLUDES:

- DVDO Air wireless transmitter with AC power supply
(Shown above)
- DVDO Air Wireless receiver with AC power supply
(Shown above)
- DVDO Air Wall/DTV receiver mounting clip
