

**PROFIBUS-PA
IP67 junction box, 6-channel
JBBS-48-E613/3G**

The 6-channel Ex junction box JBBS-48-E613/3G is designed for PROFIBUS-PA systems.

The housing is made of powder-coated die-cast aluminium and features protection class IP67.

The junction box is equipped with a selectable bus terminating resistor. The according switch is integrated in the housing on the board.

Condensation in the housing is prevented by a breather.

The shield is capacitively coupled to the housing potential. A switch for direct coupling of the shield and housing is implemented.

Note: Sufficient equipotential bonding for the installation has to be provided. The device is connected to the equipotential bond via the housing's M5 x 1 grounding bolt.

- Entity and FNICO compliant according to IEC TS 60079-27
- Can be mounted in zone 2
- Junction box for wall mounting with stainless steel M12 flange connections
- integrated terminating resistor (switch-in)
- cable shielding: capacitive or direct connection to housing potential selectable via switch
- isolated support terminal for optional protective conductor incorporated in cable
- powder-coated die-cast aluminium housing
- pressure compensation element for protection against condensation water
- connection of the housing potential via an M5 x 1 bolt
