

Mobile Mini Backplane

With SiliconImage RAID Controller

General Description

Save more spaces, get more capacities, no heating & noise problem, without Adaptor power using USB power only, Perfect for Notebook PC Professional.

External Dual Hot-Swap 2.5" SATA HD Back Plane with High-level Raid and High Storage availability in compact design, USB 2.0 / eSATA interface with integrated RAID Technology Raid 0, 1 and JBOD option. (SATA RAID control card included)

ESATA1822UESR is perfect for DVD authoring 2D/3D animation, audio editing, and streaming video and for system backup. You trust it for your storage protection on your digital photos, MP3s and other important file that you can be without.

Specification

- Fit for 2 X SATA 2.5" hard drivers
- SATA to USB 2.0 + eSATA Interface
- Easy DIP Switch for setting RAID: Raid 0,1, Single, span, strip, mirror, SAFE33, SAFE50, or GUI mode
- Transfer rate: USB2.0: 480Mbps, SATA: up to 3Gbps
- Capacity Up To 1TG (1HD), 2TG (2HDs)
- Adjust Fan Speed(High & Low) Options
- External Power adapter 100-240V/1.2A
- Sensor alarm for overheat & too low speed
- With hot-plug function
- Aluminum material and air Cooling fan
- Dimension: 85 X 55 X 170mm
- Weight: 3lbs / per unit, 10pcs/Box
- RoHS ready
- Color: Black

Package

- 1822UESR
- USB Cable x 1
- Carrying case
- eSATA cable
- Manual/CD
- Driver/software x 1

Applications

- The 1822UESR is a complete RAID solution through the use of two identical 2.5" SATA drives.
- Mounted in one portable min drive cage. It is used as a standard 2.5" HDD with mirroring or stripping (RAID0, RAID1).
- By mirroring technique, 1822UESR maintains data in two disk drives simultaneously and securely for data protection redundancy. If one drive fails, the it is automatically switch to the remaining drive.
