

DIGIPASS GO 100

A time/event based strong authentication device

For banks and other organizations that need to authenticate remote users, DIGIPASS GO 100 is a strong authentication device that boosts security while providing unmatched user acceptance. With the size of a credit card, DIGIPASS GO 100 is a robust, user-friendly and easy to deploy device. It is the slimmest DIGIPASS in the GO series which can be stored in a wallet thanks to its credit card size and can be distributed according to standard postal regulations in several countries.

DIGIPASS GO 100 is a 'one-button' authenticator, which banks and other organizations can use to effectively combat Internet fraud by replacing static or paper based password systems with DIGIPASS GO 100.

As user acceptance is crucial for the success of an authentication solution, DIGIPASS GO 100 responds to this need. It is extremely easy to use, it has the size of a credit card and as a result DIGIPASS GO 100 can easily be stored in a wallet. DIGIPASS GO 100 is fully customizable, it can carry your corporate logo, branding and custom colors, resulting in higher brand recognition for the end user.

DIGIPASS GO 100 is fully interoperable with all members of the DIGIPASS family and works seamlessly with VASCO's VACMAN, IDENTIKEY and aXsGUARD Identifier authentication server products. With these authentication server products, banks and other organizations can deploy an extremely user-friendly two-factor authentication solution for secure Internet banking and network access.

EASY TO USE

With a single push of the button, DIGIPASS GO 100 displays a dynamic one-time password (OTP) each time a user wants to remotely log onto an application, website or network. The authenticator is very easy to use: the user enters his OTP in the login screen of the application. The ease of use and the sleek design, allowing DIGIPASS GO 100 to be stored in a wallet, result in high user acceptance.

An additional server password or PIN, as a second factor of authentication, can also be applied to eliminate unauthorized use if the device is lost or stolen.

EASY TO DEPLOY

The integration of DIGIPASS GO 100 into an existing network or application is simple and swift. Static passwords or existing TAN lists (pre-printed lists of TransAction Numbers) can instantly be replaced with the more secure DIGIPASS GO 100 dynamic password. Deploying the device will be easy since the postal issuance of DIGIPASS GO 100 complies with standard postal regulation thanks to its slim design.

BENEFITS

- Ultra-portable: can easily be stored in a wallet (0.9 mm)
- Easy to use; consequently minimal training, low start-up costs and high user acceptance
- Easy to deploy
- Low total cost of ownership
- Designed for mass-deployment

FEATURES

- One button operation for one-time password generation
- Strong two-factor authentication, based upon possession of the DIGIPASS and (optionally) the knowledge of a password or PIN
- OATH event (HOTP) or time (TOTP) based algorithm
- Easily customized with corporate logos, branding and company colors
- Tamper evidence
- 2 year warranty

TECHNICAL SPECIFICATIONS

- Weight:
- ISO 7810 compliant
- Dimensions (L x W X H): 85.60 x 53.98 x 0.9 mm
- Display: high contrast 6-digit LCD
- Keypad: one-button
- Real-time clock for time based cards

CERTIFICATION AND COMPLIANCE

Physical characteristics	Dimension (LxWxH)	85.60 x 53.98 x 0.9 mm ISO/IEC 7810
Abrasion	Tabor Abrasion, Web Abrasion and Impact	NCITS 322: 2008
UL/CUL Safety, CB Scheme	Safety Standard for Information Technology Equipment	IEC 60950-1
Immunity	CE 89/336/EEC	EN 55024
Electromagnetic Compatibility	CE 89/336/EEC	EN 55022
Compliant with European directives	<ul style="list-style-type: none"> • CE: 89/336/EEC • RoHS: 2002/95/EC • EMC: 2004/108/EC 	

About VASCO

VASCO designs, develops, markets and supports patented DIGIPASS®, DIGIPASS PLUS®, VACMAN®, IDENTIKEY® and aXs GUARD® authentication products for the financial world, remote access, e-business and e-commerce. With tens of millions of products sold, VASCO has established itself as the world leader in Strong User Authentication for e-Banking and Enterprise Security for blue-chip corporations and governments worldwide.
