

USB Charge Cable SC-C2 Series

OUTLINE

USB charge cable to allow high speed communication

*Can meet a variety of specifications such as connection with a cellular telephone.

FEATURES

1. Can support USB data communication as well as charging of mobile equipment at the same time.
2. Internal DC-DC converter controls charging output. (Constant voltage / constant current control)
3. Equipped with internal protection circuits to protect the mobile equipment from over current / over voltage by shutting down the charger.

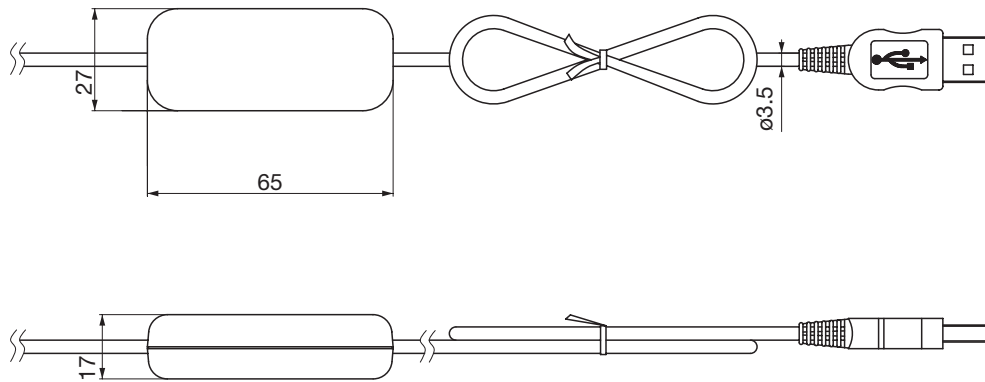

USES

1. Mobile phones.
2. Small music players.
3. Small electric equipment.

SPECIFICATIONS

Item	Specifications
Input voltage	DC 5.0±0.25V
Output voltage	DC 5.4V (when I _{out} =400mA) *Reference
Standards	USB2.0 standard corresponding
External dimensions	27 (W)×64 (D)×17 (H) mm (Not including cord and plug)

DIMENSIONS

Unit: mm
