

DESIGN YOUR OWN RESISTOR NETWORK

**YOU TELL US WHAT VALUE, TOLERANCE,
AND WATTAGE YOU WANT, AND IN A FEW
DAYS, YOU WILL RECEIVE THE
NETWORK YOU REQUIRE**

DESCRIPTION

The Accutek family of resistor networks is designed to create any value or combination of values of resistors into a single compact pluggable module.

Using our standard product boards, you specify what value, tolerance, and wattage is necessary and we assemble a resistor network utilizing surface mounted chip resistors into the circuit you require.

Custom designed resistor networks can also be supplied with your unique pin assignments and circuitry. Also, capacitors can be added to any module to provide filtering or termination.

FEATURES

- Resistors of any value or tolerance
- SIP, ZIP, or DIP packaging
- Mix and match resistors and capacitors
- Standard product for quick turn
- Custom configurations for special applications

AK14D-R7S

14 Pin DIP 7 Resistor Series (Isolated) Network

AK16D-R8S

16 Pin DIP 8 Resistor Series (Isolated) Network

AK14D-R13T

14 Pin DIP 13 Resistor Terminator (Bussed) Network

AK16D-R15T

16 Pin DIP 15 Resistor Terminator (Bussed) Network

STANDARD RESISTANCE VALUES

Standard resistance values are obtained from the decade table lby multiplying by powrs of 10.

As an example, 1.3 can represent ohms, 1.33K, 13.3K, 133K, 1.33 megohms

.1%, .25%		.1%, .25%		.1%, .25%		.1%, .25%		.1%, .25%
