The products must not be touched when operating because there is a danger of electrocution or severe burning. Always use protective safety equipment such as appropriate shields for the product and wear safety glasses. Even when disconnected any electric charge remaining in the product must be discharged and allowed to cool before safe handling using protective gloves.

Extended exposure to conditions outside the product ratings may affect reliability leading to premature product failure. Use outside the product ratings is likely to cause permanent damage to the product. In extreme conditions, as with all semiconductors, this may include potentially hazardous rupture, a large current to flow or high voltage arcing, resulting in fire or explosion. Appropriate application design and safety precautions should always be followed to protect persons and property.

Product Status & Product Ordering:

We annotate datasheets in the top right hand corner of the front page, to indicate product status if it is not yet fully approved for production. The annotations are as follows:-

| | |
|---------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Target Information: | This is the most tentative form of information and represents a very preliminary specification. No actual design work on the product has been started. |
| Provisional Information: | Some initial development work has been performed. The datasheet represents a view of the end product based on very limited information. Certain details will change. |
| Preliminary Information: | The product design is complete and final characterisation for volume production is in progress. The datasheet represents the product as it is now understood but details may change. |
| No Annotation: | The product has been approved for production and unless otherwise notified by Dynex any product ordered will be supplied to the current version of the data sheet prevailing at the time of our order acknowledgement. |

All products and materials are sold and services provided subject to Dynex's conditions of sale, which are available on request.
