Description

Advanced Power MOSFETs from APEC provide the designer with the best combination of fast switching, low on-resistance and cost-effectiveness.

The AP20N15GI-HF-3 is in the TO-220CFM isolated through-hole package which is widely used in commercial and industrial applications where a small PCB footprint and/or isolation from an attached heatsink is required. This device is well suited for use in medium voltage applications such as DC-DC converters and motor drives.
