F1500 RFI Filters

Features:

- IEC Connector Plus Common and Differential Mode Performance in Compact Case
- "L" Circuit Configuration Cost-Effective in Many Linear and Switching Power Supply Applications
- High-Inductance Design for Greater Attenuation
- Available with 0.250" Quick Connect Terminals or Wire Leads on the Load Side

F1500AX/F1500CX Simplified Schematic

Specifications:

Rated Voltage: 250VAC Maximum - 50/60 Hz Rated Current: 115VAC 250VAC 3A 1.5A

	6A	ЗA
	10A	6A
	15A	8A
Current Overload:	6X for 8 seco	nds

Hi-Pot Test (1 min):

Line to Ground 1500VAC Line to Line 1768VDC

Insulation Resistance: $9 \times 10^9 \Omega$ at 100VDC

Ambient Temperature: 40°C Max. at rated current

Humidity Range: 0% to 95% R.H.

Termination:

A: QC – Quick Connect

- B: Wire
- C: IEC Receptacle
- F: IEC Receptacle with Fuse Holder

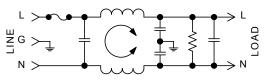

Maximum Leakage Current:

Each Line to Ground	F1500
115VAC, 60Hz:	0.25mA
250VAC, 50Hz:	0.40mA

Standard Mounting Cutouts

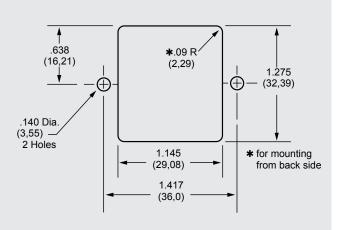

How to Order

The Curtis part numbering system is made up of four elements. Each element denotes a specific requirement (mechanical or electrical) which, when properly sequenced, fully identifies the required catalog filter. As shown, the first five alpha/numeric characters denote the series type; the sixth character (alpha) denotes the type of line termination; the seventh character (alpha) denotes the type of load termination; the last two characters (numeric) denote the current rating.

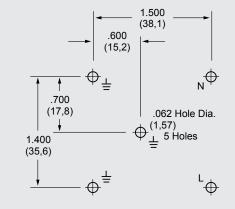

Compose your part number as follows: Select the series required, add two alpha character for the line and load termination, followed by two numeric characters for the required current rating. For example, F1100AB06 completely identifies an F1100 series filter with quick connects on line side and wire leads on load side, with a 6-amp rating.
