

# Prototyping Card for PC/104 MPC910

## Features

- ✓ .100" x .100" hole pattern
- ✓ Includes 64 and 40-pin stackthrough connectors
- ✓ Vcc and Ground trace around periphery of card
- ✓ Includes standoff hardware
- ✓ PC/104 form factor, 8-bit and 16-bit versions

The MPC910 is a prototyping board for PC/104 systems. It includes the correct hole patterns and locations for the supplied 64-pin and 40-pin stackthrough connectors. To allow maximum flexibility, PC/104 connectors and stacking hardware is included.

Because of PC/104 height requirements, the MPC910 is best suited to point-to-point soldered connections on the bottom side of the board. Alternatively, single-wrap length wire-wrap may be usable.

### Software Support

### Compatible Hardware

*Any Micro/sys computer with a  
PC/104 expansion connectr*

### Mounting/Packaging

*PC/104 standard*

### ***Specifications:***

#### **Mechanical:**

- PC/104 standard
- 3.55" (plus I/O region) x 3.775" x .6"

#### **Power Requirements:**

- Determined by user circuitry

#### **Environmental:**

- 40° - +85°C
- 5%-95% relative humidity, non-condensing

### ***Ordering Information:***

- MPC910-8 PC/104 prototyping card with connectors and hardware, for 8-bit PC/104 systems
- MPC910-16 PC/104 prototyping card with connectors and hardware, for 16-bit PC/104 systems
