Quality product

 Made in USA with a comprehensive 6-year warranty

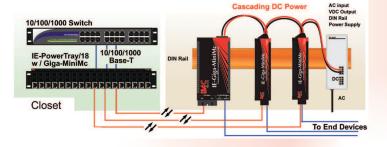

Media conversion is the most cost-effective and flexible solution for implementing new technologies on legacy wiring plants and equipment. But even reasonably-priced media converters can tack on a substantial sum to networking costs. And space constraints can also be an issue when hundreds of conversions are required.

IMC Networks once again has the solution! Measuring less than 3.5 inches deep and 2 inches wide, and having both data connections on the same side of the unit, the IE-Giga-MiniMc is the industry's smallest media converter at a fraction of the cost of other alternatives.

With Plug-and-Play, Auto Negotiation and AutoCross operation, extreme operating temperatures (-25° C to +85° C), DC or AC power, the IE-Giga-MiniMc miniature media converter is easy and convenient to use.

Application Example

When installing multiple IE-Giga-MiniMc units on a DIN Rail (DIN clips sold separately), you can easily connect the DC input source from one IE-Giga-MiniMc DC power terminal to the next IE-MiniMc DC power terminal.
