Available Options

Increased Output Power

The conservatively rated unit allows to deliver extra output with the same reliability.

At some derating, either the maximum output voltage or the maximum output current can be increased by about 10%.

- Order Code - P069

High Speed Programming

A 10 to 20 times higher programming speed (down to 0.4 ms rise time at full load)

and lower output capacitance ¹⁾. Excellent for laser applications, test systems or as current source with low parallel capacitance as used in plasma chambers.

- Order Codes:
 SM 15-400 P166 - SM 30-200 P167
 SM 45-140 P168 - SM 60-100 P169
 SM 70-90 P170 - SM 120-50 P171
 SM 300-20 P172 - SM 600-10 P270

Two-Quadrant Output: Power sink

Two quadrant operations maintains the output voltage constant

regardless the output power is positive or negative ¹⁾. Ideal for PWM-speed controlled DC-motors and ATE systems.

- Order Codes:
 SM 15-400 P230 - SM 30-200 P231
 SM 45-140 P232 - SM 60-100 P233
 SM 70-90 P234

Sequencer

Arbitrary Waveform generator or standalone automation. The sequencer is integrated in the Ethernet controller.

- Order Code - P157

High Voltage Isolation

A higher output isolation allows series operation up to 1200V. Is standard on SM300-20 and SM600-10.

- Order Code - P089

High Input Voltage

Higher input voltages possible for operations at line voltages of 440 V AC and 480 V AC (for USA).

- Order Code - P165

Software control and Interfaces

Factory installed programming interfaces ²⁾:

- ISO AMP Card - isolated analog - P154 ³⁾
- RS232 controller - P155
- IEEE488 controller - P156
- Ethernet contr. (incl. sequencer) - P157
- PROFIBUS controller - P277
- CANBUS controller - P278

Digital Voltage and Current Setting

Reliable, longlife digital encoders can be implemented at the front panel.

Includes total front panel lock (also for CV/CC-knobs) and a coarse or fine pitch adjustment depending on the turning speed. Is standard on SM300-20 and SM600-10.

- Order Code - P220

Secured Voltage and Current Setting

For a maximum security, the CV/CC settings can be adjusted with a screwdriver only and are protected with a plastic cap from accidental adjusting. SM300-20, SM600-10 and units with option P220 already have secured settings.

- Order Code - P001

Notes: 1. Download special datasheets about High Speed Progr., Power Sink and Battery Charging from www.DeltaPowerSupplies.com.
 2. There is only room for one of the interfaces in a unit (P154, P155, P156, P157, P277 or P278).
 3. SM300-20 and SM 600-10 standard equipped with ISO AMP, this can be replaced by P155, P156, P157, P277 or P278.
