

Description

- HDPE durAstatic™ Bottles are dissipative and are designed to protect your valuable static sensitive printed circuitry
- No migratory additives - reduces the chance for contamination from the bottle
- Highly visible with ESD symbol, allowing people to immediately know the bottle is ESD protective
- Long lasting dissipative properties:
Rtt: 10E4 to <1 x 10E11 ohms tested per ANSI/ESD STM11.12
<2 second charge decay, tested per IEC 61340-5-1:1998
- “Flask” style shape provides stability
- Dispenses approximately 2cc of liquid with each pump
- Genuine Menda “dish-type” liquid dispenser pumps and bottle one-handed operation dispensing small amount of liquid into top dish
- Genuine Made in America Menda pump and bottle - accept no substitutes

“It should be understood that any object, item, material or person could be a source of static electricity in the work environment. Removal of unnecessary nonconductors, replacing nonconductive materials with dissipative or conductive materials and grounding all conductors are the principle methods of controlling static electricity in the workplace, regardless of the activity.” (ESD Handbook ESD TR20.20 section 2.4 Sources of Static Electricity)
