

DC-DC CONVERTIES

POLA Non-isolated

- 60 A output current <sup>(7)</sup>
- 3.3/5 V input voltage (2.95 Vdc to 5.5 Vdc)
- Wide-output voltage adjust (0.8 Vdc to 2.5 Vdc)
- Auto-track<sup>™</sup> sequencing\*
- Margin up/down controls
- Efficiencies up 93%
- Output ON/OFF inhibit
- Differential remote sense
- Programmable input Under-Voltage Lockout (UVLO)
- Point-of-Load-Alliance (POLA) compatible
- Available RoHS compliant

The PTH04040 is a next generation series of non-isolated dc-dc converters offering some of the most advanced POL features available in the industry. The primary new feature provides for sequencing between multiple modules, a function, which is becoming a necessity for powering advanced silicon including DSP's, FPGA's and ASIC's requiring controlled power-up and power-down Other industry leading features include margin up/down controls and efficiencies up to 96%. The PTH04040 has an input voltage of 2.95 Vdc to 5.5 Vdc and offers a wide 0.8 Vdc to 2.5 Vdc output voltage range with up to 60 A output current, which allows for maximum design flexibility and a pathway for future upgrades.

All specifications are typical at nominal input, full load at 25 °C unless otherwise stated  $C_{in}=1000~\mu\text{F}$ ,  $C_{out}=660~\mu\text{F}$ 

**SPECIFICATIONS** 

## **OUTPUT SPECIFICATIONS**

| Voltage adjustability           | $\begin{array}{l} 2.95 \leq V_{i} \leq 4.5 \ V \\ 4.50 \leq V_{i} \leq 5.5 \ V \end{array}$ | 0.8-1.65 Vdc<br>0.8-2.5 Vdc           |
|---------------------------------|---|---------------------------------------|
| Setpoint accuracy               | (See Note 1)  | ±2.0% Vo                              |
| Line regulation                 |   | ±5 mV typ.                            |
| Load regulation                 |   | ±5 mV typ.                            |
| Total regulation                | (See Note 1)  | ±3.0% Vo                              |
| Minimum load                    |   | 0 A                                   |
| Ripple and noise                | 20 MHz bandwidth  | 15 mV typ.                            |
| Transient response (See Note 4) |   | 00 µs recovery time undershoot 200 mV |
| Margin adjustment               | (See Note 8)  | ±5.0% Vo                              |

### **INPUT SPECIFICATIONS**

| Input voltage range                  | (See Notes 3, 5)                           | 2.95-5.5 Vdc                        |
|--------------------------------------|--|-------------------------------------|
| Input standby current                |  | 60 mA typ.                          |
| Remote ON/OFF                        | (See Note 5)                               | Negative logic                      |
| Undervoltage lockout<br>(Pin 8 open) | (See Note 6)<br>On threshold<br>Hysteresis | 6.6-7.5 Vdc typ.<br>2.60 V<br>0.6 V |
| Track input current                  | Pin 18 (See Note 2)                        | -0.11 mA                            |

## **EMC CHARACTERISTICS**

| Electrostatic discharge | EN61000-4-2, IEC801-2 |
|-------------------------|-----------------------|
| Conducted immunity      | EN61000-4-6           |
| Radiated immunity       | EN61000-4-3           |

#### **Notes**

- The set-point voltage tolerance is affected by the tolerance and stability of  $R_{\text{SET}}$ . The stated limit is unconditionally met if  $R_{\text{SET}}$  has a tolerance of 1% with 100 ppm/°C or better temperature stability.
- This control pin has an internal pull-up to Vin nominal. If it is left opencircuit the module will operate when input power is applied. A small lowleakage (<100 nA) MOSFET is recommend for control. For further information, consult Application Note 192.
- A 1000 μF input capacitor is required for proper operation. The capacitor must be rated for a minimum of 400 mA rms of ripple current.

- This is with a 1 A/ $\mu$ s loadstep, 50 to 100%  $I_{omax}$ .  $C_0 = 660~\mu$ F. The minimum input voltage is 2.95 V or 1.34 x  $V_o$ , whichever is greater. These are default voltages. They may be adjusted using the 'UVLO Prog.' control input. Consult Application Note 192 for further details.
- See Figures 1 and 2 for safe operating curves. All power pins must be used
- A small low-leakage (<100 nA) MOSFET is recommended to control this pin. The opencircuit voltage is less than 1 Vdc.
- To order Pb-free (RoHS compatible) surface-mount parts replace the mounting option 'S' with 'Z', e.g. PTH04040WAZ. To order Pb-free (RoHS compatible) through-hole parts replace the mounting option 'H' with 'D', e.g. PTH04040WAD.
- 10 NOTICE: Some models do not support all options. Please contact your local Artesyn representative or use the on-line model number search tool at http://www.artesyn.com/powergroup/products.htm to find a suitable alternative.
