

SMS2270

Advanced MDTV Multi-Standard Receiver
with ISDB-T Full-Seg and n-way Full MRC Diversity

Mobile, Portable PC, Set-Top Box, HDTV & Automotive Applications

The SMS2270 is a new member of Siano's single-die, multi-standard MDTV receiver chips and the first one to support ISDB-T Full-Seg (13-Seg) on top of 1-Seg and 3-Seg, enabling a complete entertainment solution with DVB-T, T-DMB, DAB, and DAB 2.0.

The SMS2270 provides a single-package, cost-optimized solution for ISDB-T Full-Seg by integrating Siano's cutting-edge third generation multi-standard technology together with an SRAM die. Siano's SMS2270 provides single-die implementation of the company's RF and demodulator while achieving new outstanding deep in-door and mobility performances.

The SMS2270 achieves new mobility records due to enhanced, dedicated mobility engine. It provides superior sensitivity, flat across the entire spectrum of the various supported bands, as well as best-in-class immunity to tough multi-path field conditions. The SMS2270 provides optional support for FM radio with RDS, mass storage and multiple (n-way) MRC diversity for varied standards.

Siano's SMS2270 enables TV reception in a variety of devices for both in-door and out-door solutions, such as set-top boxes or HDTV, mobile phones, cellular data-cards, notebooks, navigation devices, UMPCs, MIDs, PDAs, portable video and media players as well as optimal TV reception in automotive entertainment devices. The SMS2270's integrative and system oriented design approach enables integrating several MDTV standards' functionality to portable and handheld devices at a reduced system cost and fast time to market.

The SMS2270 is complimented by Siano's Host-API software package that includes drivers and libraries for popular host processors and operating systems.

The input to the SMS2270 is the broadcasted RF signal received by the antenna. The output is a demodulated, selected channel stream. This data is fed into an application processor that is capable of video and audio decompression and rendering.

Highlights

- Single-die, multi-standard MDTV receiver chip with ISDB-T Full-Seg
- Pin-to-pin compatible with Siano's SMS2230
No need for additional memory
- Multiple (n-way) MRC diversity, up to 4 separate antennas supported on system level
- Mass storage support
- FM stereo with RDS
- Superior mobility and extremely high sensitivity
- Best-in-class immunity to tough multi-path field conditions

Typical Applications

- Set-top boxes & HDTV
- Mobile phones
- Cellular data cards
- PMPs, PNDs & MP-4
- PC applications
- Automotive infotainment devices

Target Markets

- Global

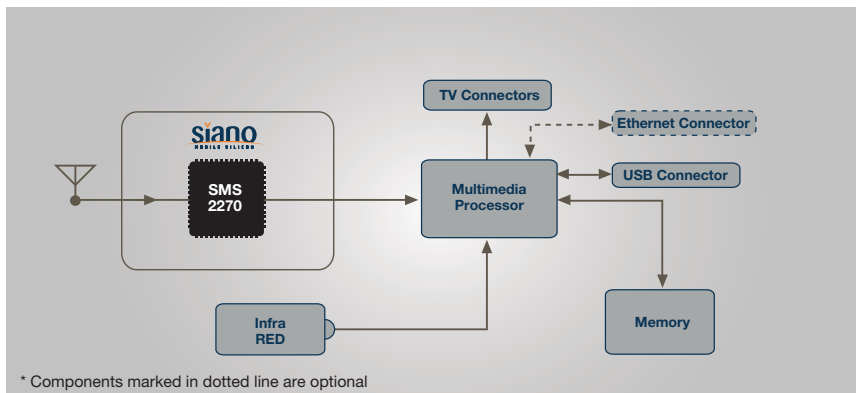

SMS2270

Advanced MDTV Multi-Standard Receiver
with ISDB-T Full-Seg and n-way Full MRC Diversity
Mobile, Portable PC, Set-Top Box, HDTV and Automotive Applications

Key Features

- No external active components
- Superior mobility algorithms
- Recording (PVR) – including dual frequency (in MRC system)
- USB 2.0 compliant
- RoHS compliant
- Pin-to-pin compatible with
 - SMS2230 (high performance, low-cost, multi-standard receiver)
- Complete MDTV receiver solution:
 - Device drivers
 - Middleware for popular host processors
- Certified USB device drivers:
 - Microsoft Windows XP (WHQL)
 - Microsoft Windows Vista (WHQL)
 - Microsoft Windows 7 (WHQL)
 - Linux
- 9mm x 9mm x 0.9mm
116 pin BGA, 0.8mm pitch

Integration of SMS2270 into a Set Top Box

Supported Standards

- ISDB-T
 - Full-Seg
 - 1-Seg & 3-Seg
 - sb & mm
- DVB-T
- T-DMB, DAB, DAB+, DAB V.2
- FM Radio with RDS

Supported Bands

- Low VHF/VHF (64 -240 MHz)
UHF (470-862 MHz)

Supported Interfaces

- USB 2.0 High Speed (HS)
- 2xSPI (Master/Slave)
- SDIO (Slave)
- Parallel Bus (Slave)
- Serial/parallel Transport Stream (TS)
- Serial (I²C-like) Control
