## The Elo TouchSystems 2242L, a 22-inch open-frame touchmonitor with IntelliTouch Plus touch technology

provides OEMs and design engineers the ability to develop multi-touch applications compatible with Microsoft Windows® 7 operating system for dynamic, reliable touch-enabled applications including graphically intense kiosk applications such as photo kiosks, gaming, concierge and other guest-engagement hospitality experiences. Gaming and hospitality environments present unique performance and durability requirements for touch screens and the Windows 7 operating system delivers distinct design advantages with its stable and innovative touch interface. The 2242L blends these market needs and OS capabilities of Windows 7 to provide an increased range of touch options for these applications.

IntelliTouch Plus Surface Acoustic Wave (SAW) touch technology received Windows 7 Touch Additional Qualification (AQ) status for touch interactivity by meeting test criteria established by Microsoft for Windows 7. With this testing, customers can trust that the 2242L, and the ability to effortlessly take advantage of the touch functionality built into Windows 7.

Unique to the 2242L Windows 7 compatible touchmonitor is the use of Tyco Electronics IntelliTouch Plus which, unlike other multi-touch technologies, utilizes three axes of touch information to deliver sensitive, accurate, drift-free

recordings of two simultaneous touch locations anywhere on the screen regardless of position or pressure applied. IntelliTouch Plus utilizes pure-glass construction to deliver excellent imagery, high light transmissions and is not affected by variations in ambient or extreme light. IntelliTouch Plus supports finger and soft stylus activation and features durable, scratch-resistant glass to assure continuous surface performance even if scratched.
