

DVD Duplicator

Features:

- Copy DVDs at up to 16X speed.
- User-friendly interface with LCD screen and four front-panel buttons.
- Stand-alone form factor does not require installing software.
- On-the-fly duplication from DVD ROM to DVD writer, no internal hard drive.
- Ideal for backup of software installers, sound library CDs, and DVD sample libraries.
- Internal quiet fan keeps the enclosure cool.
- Verify and Compare functions assure that the copy is identical to original.
- Perfect solution for backup and distribution of your precious work, and to make copies for clients.

One-to-One DVD/CD Duplicator.

Glyph's stand-alone duplicator allows a one-to-one copy of CDs and DVDs. The unit contains a controller module, a DVD-R/RW, and a DVD-ROM. Duplication is simple and only requires that you insert a master copy into the ROM and use the controller to copy its contents to the burner. It supports additional functions such as burn simulation, simulation and copy, verify, compare, prescan, disc info and others. It works equally well with single-layer and dual-layer DVDs, DVD-R/RW and DVD+R/RW. It will not duplicate commercial DVD movies due to copy protection on the source DVD. Glyph's Duplicator allows you to distribute and backup your precious work.
