

# SLite rental structure

Barco's SLite rental structure has been purpose built to facilitate the fast,easy build-up and break-down of an SLite LED display.With its light-weight,slim profile design and easy-to-use locking mechanisms, the SLite rental structure is ideal for use in rental &staging applications.

The SLite flightcase,which holds four SLite rental structures (with tiles) per case,is equipped with heavy-duty locks and ultra-hard wearing polyurethane castors to withstand the most demanding of rental envi- ronments.A specially designed trolley system also enables build up of the display directly from the flightcase.

**Product specifications****SLite rental structure**
