

DISplayer² lite mini

Mini media player for content visualization

The DISplayer lite mini has been designed for smaller digital signage projects. All markets become more and more demanding to efficiently display different kinds of content. The DISplayer lite mini is smaller, energy-efficient and cost-effective.

Full flexibility

Both static (text and images) and dynamic content (such as light flashes) can easily be processed by the DISplayer lite mini. It is fully compatible with LED and LCD displays and projectors. Any number of displays or projectors can easily be matched to display the same message at the same time.

Reliable playback of content

The DISplayer lite mini is a reliable and solid tool for content playback in HD Ready on almost any type of display. Thanks to its compact size and unique 24/7 reliability, the DISplayer lite mini is perfectly suited for a wide range of professional applications.
