

MR-300-L

Software-based mission recording solution

Barco's MR-300-L is a high-performance, **software-based mission recording solution**. Barco's MR-300-L mission recording option runs on the mission computer, **captures the screen content and compresses it** before recording it on a local or a network attached file.

The MR-300-L mission recording solution is used as an option for Barco's **Vista 4500** consoles and **DPM** rugged computers.
