

# LED video wall upgrade kit

## Barco's LED video wall technology refresh program

To bring your control room visualization technology to the most recent high-quality standards, Barco now offers an all-in-one technology refresh program for its legacy video wall systems.

The video wall upgrade kit enables customers to upgrade from Barco's lamp-based OV-D2 (DLP), D1 (DLP) and p-Si (polysilicon LCD) video walls to its new LED-powered video walls.

### A cost-effective migration path

Barco's LED-lit rear-projection video walls offer an unequalled visual experience in a wide range of 24/7 applications. Equipped with a unique liquid cooling system, the new video walls have a LED lifetime of up to 80,000 hours and a brightness level that is 20% higher than any other LED video wall on the market. Barco's Sense6 auto-calibration technology guarantees uniform colors and consistent brightness over time and across the display, eliminating the need for manual interventions.

With this video wall upgrade program, Barco offers a cost-effective migration path for current and legacy video wall installations - even installations dating from the late nineties. Please consult your Barco representative for more information on how to upgrade to Barco's LED-lit projection system.

The video wall upgrade kit includes:

- New LED-based projection engine
- New illumination unit with input box and cooling unit
- New mounting brackets & sheet metal
- Technology assessment for video wall controller upgrade

The new LED-based projection model and illumination unit can be seamlessly

**BARCO**

Visibly yours
