

OBLX-55 1x2 Extension kit

Horizontal extension kit for OBLX-55 free-standing structure

This extension kit adds one more column of narrow-bezel LCD panels to an OBLX-55 centered video wall. The extension resembles the OBLX-55 in looks, but does not have the ability to store any hardware inside its leg, and has no centralized on/off switch. This means a video wall consists of one OBLX-55, and a number of extension kits.

Unlimited horizontal expansion

The number of extension kits that can be added to an OBLX-55 centered LCD video wall is in theory unlimited. This means that such a video wall can have any width you want. A free-standing structure, OBLX needs no wall support to install. This makes this system ideal for use in enterprises, exhibitions, and for advertising purposes.

The extension kit contains the structure and the design trims that protect the sensitive edges of the narrow-bezel LCD panels. Please order the corresponding 55" LCD displays separately.
