

# AC-AR03

## Arcos 3000 arm

The AC-AR03 arm is designed for installation at waist height in a typical hospital bedside application. The arm can be fixed to a wallbox and can be easily parked away from the bedside when necessary.

### **A perfect fit for bedside terminals**

The arm is easily manoevrable to provide the user with the optimum position when using the touchscreen interface. The “A frame” arm integrates a custom gas spring and movement mechanism which is adjusted especially to fit with the Smart Terminal attached to the arm.

**Product specifications****AC-AR03**
