SWINGDUCTOR™ SELF LEADED

DESCRIPTION

- Swinging Choke In Toroid Packaging

ENVIRONMENTAL DATA

- Storage temperature range:
-55°C to +130°C
- Operating temperature range:
-40°C to +130°C

PACKAGING INFORMATION

- Packaging information: pg. 493

FEATURES & APPLICATIONS

- Primarily designed for use in applications that require a known inductance change with changing current loads in power supplies
- Special core material allows "controlled saturation" for a repeatable specific inductance value at a specific current up to 1 MHz.
- As a result of the toroidal design, Swingductors produce a closed magnetic field resulting in low EMI

Verify operation with sample in actual circuit. Order samples at www.rencousa.com.
