

Bluetooth® Adapter

Class 1 BC04-ext Phone Adapter

BTA-320

The BTA320, Bluetooth phone adaptor can be connected to traditional telephone line and allow user to answer the phone call by Bluetooth headset. A traditional telephone can also be connected to BTD320's telephone port to perform usual functions. That is, with BTA320, the user can answer the phone call either by Bluetooth headset or traditional telephone.

There is duplex audio phone jack for connecting to computer's line out and microphone input. When switching the audio path to this phone jack, user can talk on the computer by VoIP applications such as Skype®.
