

Features

- ◆ SIP-package fits existing TO-220 footprint
- ◆ Suitable for positive & negative output circuit
- ◆ Pin compatible with LMxx linear regulators
- ◆ Built in filter capacitors
- ◆ Operation temp. range -40°C to $+85^{\circ}\text{C}$
- ◆ No heat-sink required
- ◆ Over-temperature protection
- ◆ Short circuit protection
- ◆ Wide input range up to 42 VDC
- ◆ Excellent line / load regulation
- ◆ Low standby current
- ◆ 3-year product warranty

The new TSRN-1 series step-down switching regulators are drop-in replacement for inefficient 78xx linear regulators. A high efficiency up to 95 % allows full load operation up to $+70^{\circ}\text{C}$ ($+85^{\circ}\text{C}$ with derating) ambient temperature without the need of any heat-sink or forced air cooling.

The TSRN-1 switching regulators provide other significant features over linear regulators, i.e. better output accuracy ($\pm 2\%$), lower standby current of $\sim 2\text{ mA}$ and no requirement of external capacitors. They are suitable for positive or negative output circuits. The high efficiency and low standby power consumption make these regulators an ideal solution for energy sensitive applications.

Applications notes

Positive output operation:

C1 = 22 μ F / 50 V (required only if input voltage is higher than 36 V)

Negative output operation:

C1 = 10 μ F / 50 V, 1210 X5R MLCC
C2 = 10 μ F / 25 V, 1206 X5R MLCC
