Deskstar®

3.5-inch High-Capacity Desktop Hard Drive

The HGST Deskstar internal hard drive kit delivers colossal add-on storage and award-winning performance with an industry-standard interface. Choose either a high-performing 7200 RPM or low-power CoolSpin models in a standard 3.5-inch desktop form factor. No additional hardware is required to overcome the 2.2 TB limitations of Windows® systems with 4 TB and 3 TB kits as they ship with HGST GPT Disk Manager.

CoolSpin™ technology provides excellent power utilization and heat emission, as well as quiet acoustics.

The HGST Deskstar hard drive features a robust mechanical design that exceeds the industry standard for quality and reliability. Through a patterned ramp load/unload design, the risk of shock damage is minimized by eliminating direct contact between the heads and disks, reducing wear and heat while improving the overall drive reliability and power efficiency.

* HGST Deskstar 3.5" 3TB internal hard drive kit includes access to the HGST GPT Disk Manager, an easy to use software application designed to overcome the 2.2 TB limitation of Windows® systems. Works with 32bit and 64bit Windows® XP, Windows Vista®, and Windows® 7 operating systems. Not required for Mac OS® and Linux® systems. The HGST GPT Disk Manager for HGST Deskstar 3.5" 3TB internal hard drive does not support RAID configurations and the resulting hard disk drive volume cannot be used as boot volumes.

† One gigabyte (GB) is equal to one billion bytes and one terabyte (TB) equals 1,000 GB (one trillion bytes) when referring to hard drive capacity. Accessible capacity may be less.
