

Ultrastar™ SSD400S.B

Enterprise Solid State Drives

Highlights

- SLC NAND Flash for ultra-high performance and endurance
- Best IOPS/Watt for reduced TCO
- · 6Gb/s SAS interface for maximum throughput
- Advanced Power-loss Data Management technology
- Trusted Computing Group's (TCG) Self-encrypting models designed to Enterprise A specification

Applications/Environments

- Ultra-high performance tier-0 enterprise storage
- Enterprise-class servers and High Performance Computing
- Space and/or power constrained environments
- · Online Transaction Processing (OLTP
- Video pre/post production
- Financial, eCommerce
- Database Analytics
- Cloud Computing

Next Generation SSD From a Proven Enterprise Storage Player

HGST leverages decades of proven enterprise storage expertise in Serial Attached SCSI (SAS) design reliability, firmware, customer qualification and system integration to the new Ultrastar SSD400S.B solid-state drive (SSD) family. The synergistic relationship between HGST's new throughput-enhancing SSDs and traditional HDDs provides cost effective, end-to-end enterprise-class storage solutions, delivering reliability, compatibility, capacity, cost and system performance. This combination makes HGST a leading HDD/SSD provider with the experience and technology needed to meet escalating reliability, endurance, and performance in the most demanding enterprise environments.

Extreme Endurance and Performance for the Enterprise

The new Ultrastar SSD400S.B delivers high sequential throughput, up to 536MB/s read and 502MB/s write (6Gb SAS). The Ultrastar SSD400S.B also delivers up to 57,500 read and 25,500 write IOPS, reaching speeds 100 times faster than HDDs, allowing rapid access to "hot" enterprise data for improved productivity and operational efficiency. Since less SSDs are required to achieve the same HDD IOPS performance, the new Ultrastar SSD400S.B family offers significant value in terms of IOPS per Watt, while reducing total cost of ownership (TCO) through low power consumption, efficient cooling and reduced space requirements.

The Ultrastar SSD400S.B family combines enterprise-grade SLC NAND flash memory, advanced endurance management firmware and power loss data management techniques to extend reliability, endurance, and sustained performance over the life of the SSD. The Ultrastar SSD400S.B family achieves an extraordinary 0.44% annual failure rate (AFR) or two million hour mean-time-between-failure (MTBF). The 400GB capacity Ultrastar SSD endures up to 35 petabytes (PB) of random writes over the life of the drive – the equivalent of writing 19.2 terabytes (TB) per day for five years.

For complete end-to-end data protection and reliability, the Ultrastar SSD400S.B family incorporates the T10 Data Integrity Field (DIF) standard, extended error correction code (ECC), Exclusive-OR (XOR) parity to protect against flash die failure, parity-checked internal data paths without an external write cache, and an exclusive power loss data management feature that does not require supercapacitors. The Ultrastar SSD400S.B family is backed by a five year limited warranty, or the maximum petabytes (PB) written (based on capacity).

Features and Benefits

| | Feature / Function | Benefits | |
|-----------------------|--|--|--|
| Performance | SAS 6Gb/s | Dual port for enhanced reliability | |
| | SLC NAND Flash Memory | Highest write performance and endurance | |
| | 536 / 502MB/s Sequential R/W | Max throughput and IOPs for ultra-fast access to data. | |
| | 57K / 25K IOPS Random R/W | 100x faster than typical HDD | |
| Power | 5.5 Watts, typical | Up to 60% less power than 3.5-inch 15K RPM HDD | |
| Capacity ¹ | 400GB, 200GB, 100GB | More capacity for less space and power | |
| Reliablity | 0.44% AFR (2M Hours MTBF) | Reduced field replacement effort | |
| | 1E-16 Bit Error Rate (BER) | Enhanced error detection and correction for optimal data integrity | |
| | T10 End-to-end Data Protection | Protection against flash die failure | |
| | Exclusive-OR (XOR) NAND | Enhances data integrity during power failure | |
| | Power-loss Data Management | Maximum endurance over the life of SSD | |
| | Unlimited reads, up to 35PB writes | | |
| Integration | HDD architecture commonality | Compatibility with Ultrastar SAS/FC HDD | |
| | Global Systems Integration & Test Labs | Extensive interoperability and compliance testing | |

Ultrastar™ SSD400S.B

HGST Quality and Service

HGST's Ultrastar SSD400S.B family extends the company's long-standing tradition of performance and reliability leadership. A balanced combination of new and proven technologies enables high reliability and availability to customer data.

HGST drives are backed by an array of technical support and services, which may include customer and integration assistance. HGST is dedicated to providing a complete portfolio of HDD/SSD solutions to satisfy today's monumental computing needs.

How to read the Ultrastar model number

HUSSL4040BSS600 = 400GB, SAS 6Gb/s

H = HGST

= Ultrastar

Standard S

SL = Single-level cell (NAND)

40 = Full capacity — 400GB

40 = Capacity this model, 40 = 400GB (20 = 200GB, 10 = 100GB)

= Generation code Α

= Small Form Factor (vs. L for Large FF) S

S6 = Interface, SAS 6Gb/s

0 = Reserved

= Reserved (1= TCG Encryption)
