

Stream high quality music from your mobile device in your hand or laptop!

Wireless Bluetooth® Docking Station

The Knoll DC-8BT is our third generation wireless Bluetooth® docking station. Now featuring HD sound your music is clearer with a higher dynamic range. It allows you to connect any Bluetooth® source including iPhone®, iPad®, iTouch®, Smartphone, laptop, etc. to your stereo wirelessly.

This makes controlling your music content a breeze. Installation is fast and easy. Just connect your DC-8BT to your stereo with the included connectors, plug in the power supply, pair the DC-8BT with your Bluetooth® device and play some music. It's that easy.

You are controlling the music content with your hand held device and easily making the changes you want. Best of all music delivery is secure with a full frequency response, thanks to the most recent advances in stereo Bluetooth®.

With the Smartphone in your hand you are ready to take calls while playing music, instead of having to run to the docking station every time a call comes in.

Knoll Systems makes a full line of high-quality audio and video products. Knoll Systems is known for its technical firsts and award winning amplifiers, infrared repeaters, volume controls and video projectors.

Knoll Systems amplifiers and projectors, along with an extensive line of home theater and custom installation products, offer performance and value that is unmatched worldwide.
