

Have easy, high-quality video meetings at any time from anywhere.

ConX™ bridges technology gaps so you can make important visual connections with people on the devices they already use.

Bring people together from...

- Web browsers (PC or Mac)
- SIP or H.323 end-points
- Audio-only phones

Seeing is understanding

Meetings are more efficient when information is clearly communicated. Facial expressions, body language, objects, colors and more all help people understand the topics at hand, solve problems and save time.

Ready when you are

Great ideas can arrive at any time. Be ready with InFocus ConX. Invite people to a meeting with a simple QuickConX™ web link and you'll see each others' faces in a matter of minutes.

Flexible and affordable

Choose from several plans that will fit into your organization's size, budget and bandwidth. Our commitment: outstanding service at value pricing.

Easy to use

From a SIP device, simply call, enter the secure room code, and you're in. When multiple endpoints are dialed in, the interface will automatically resize the screens to highlight the one that's talking.

** Larger meeting rooms can be hosted by request.*

QuickConX™ Web Browser Client

Participants can easily join a ConX meeting from their PC or Mac using our free QuickConX browser-based video conferencing client. Just go to <http://quickconx.infocus.net>, enter your name, meeting room number and PIN. No account needed.

Plus, organizers can invite people to a meeting with a URL that has the meeting room and PIN built-in. Participants simply click the URL, enter their name and they're in.

Sample QuickConX URL

<http://quickconx.infocus.net/call/30155:1234>

In this example, we've used "30155" for the room and "1234" for the PIN.
