

PIN STRIP HEADER (Detachable Insulator)

FEATURES

- Detachable insulator for ultra low profile applications
- Cost effective replacement for pin staking
- MATE-RITE TIP prevents scraping of mating socket
- Rounded tails facilitate board placement
- Mates with Crane's ATP, ATS, ABH, ABS, and ABT Sockets; JUN Jumpers

PIN STAKING ALTERNATIVE?

A Crane customer, frustrated with the "downtime" associated with his pin staking operation, ran tests to see if it would be a cost effective alternative to use Crane's DPEG Series connectors. The tests revealed he would not only save money, but eliminate the noise and rough handling associated with the staking operation.

SINGLE ROW (1 to 40 Positions)

DUAL ROW (2 to 80 Positions)

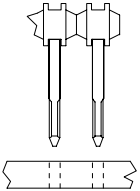

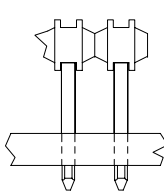

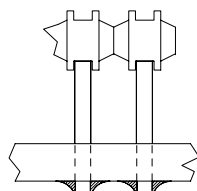

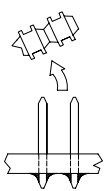

TRIPLE ROW (9 to 120 Positions)

STANDARD TAIL OPTIONS ON 0.100" (2,54mm) PIN STRIP HEADERS

"R" COINED	"K" KINKED	"F" FINE	"Q" SQUARE
The standard "R" option provides a coined tail improving solder action while making insertion easier.	The "K" option provides a kinked tail, reducing unwanted movement on the PC board.	The "F" option combines an 0.018" rounded tail with an 0.025" square post. This fine line feature allows more traces between holes.	The "Q" option provides an 0.025" square tail for use in wire wrap applications.
