MatriVideo™ Command Center One (CCOne) is a free software package designed to manage a single DVR, NVR, or Hybrid DVR. It is bundled with any MatriVideo™ recorder to provide a simple and effective software and hardware solution ideal for multi-site market segments such as quick service restaurants, convenience stores, schools, residential housing and many more. With CCOne, regional managers have an easy platform to control and manage their daily operation.

CCOne provides the functionality to view live video and perform playback, system configuration setup, and alarm management. Through its user-friendly graphical user interface, even non-technical users can operate the application software with comfort and ease.

CCOne can display real-time live video in 30 frames per second per camera, playback recorded video, view alarm instances, and control PTZ cameras remotely. With the Instant Playback function, security professionals can review any video moments after the occurrence by simply clicking the mouse once on the display panel.

MatriVideo™ CCOne is Simple, Easy, and Intuitive

MatriVideo™ Command Center One is a software package which can easily be installed on an on-site computer, remote office desktop, or an executive laptop, with a simple TCP/IP connection.

Users need to supply their own client PC and monitor. The recommended hardware specifications are listed in the following table.

MATRIVIDEO

A complete system to provide high resolution, long term digital video storage and IP based CCTV solution on a scalable and reliable platform MatriVideo™ is a complete solution for digital video surveillance. It is a platform that incorporates the legacy analog CCTV system and new IP-based digital surveillance system with a hybrid configuration, distributed enterprise architecture and centralized management.

MatriVideo™ is an open platform that adopts the latest IT technology yet provides easy installation and configuration for security professionals. It is designed with flexibility and scalability for enterprise video management. MatriVideo™ answers the need for larger storage capacity, networkable components, smarter image searching and playback, high image resolution and easier camera relocation. It provides a total solution that meets the emerging and diverse demands of the security industry.
