

Overview

MCLASS enclosures are engineered to house FlexPower® power management boards alongside access hardware in one compact, secure system.

This unit is a 12V and 24V DC dual voltage access power system.

C8 lock control module provide eight access control inputs capable of voltage or dry contact activation, and eight outputs programmable for failsafe / failsecure operation at either 12 or 24 VDC and controlled by the integrated fire alarm interface circuit on the FPO. D8 module provides eight auxiliary class II outputs and each output is configurable for 12 or 24VDC operation.

MClass enclosures are painted steel with removable backplate and include lock, two (2) keys and tamper switch.
