

SmartReader Plus 6

Eight-Channel Temperature Data Logger

The SmartReader Plus 6 data logger is ideal for monitoring temperature over a wide range. Easily and accurately record temperature from any J, K, S, T or E type thermocouple probe. With seven inputs for thermocouple probes and an on-board cold-junction thermistor, the SmartReader Plus 6 is one of the most versatile thermocouple data loggers available.

APPLICATIONS

Monitor performance of gas-fired heating equipment, verifying concrete curing temperatures, process verification, etc.
