

Super Talent Wi-Cap

Introduction

With a modern, sleek design the Super Talent Wi-Cap gives you the ability to share files, photos, music, and videos with nearby devices. This ultra-portable drive creates its own wireless network to transfer your files over and requires no internet connection. The Wi-Cap can be regarded as a data center and is compatible with use on laptops, tablets, and smartphones and with a variety of browsers and operating systems. The micro USB port on the Wi-Cap can easily be used to transfer files to the device and to update firmware.

The Wi-Cap is available in a capacity of 4GB. This product also features an external microSD slot for additional storage options. All designs are thin and equipped with blue and red indicator lights to let you know when the drive is active. Navigating the contents of the Wi-Cap is easy with the use of menus which appear in your browser of choice after a connection has been established. Password protection is included to ensure only the users you approve can access the contents of the drive. The Super Talent Wi-Cap is ideal for situations requiring a simple, straight forward way to share information among devices.

Specifications

Capacity*	4GB
Interface	802.11a/b/g/n, USB 2.0
OS Support	Windows/Linux/Mac
