

M24 Series Multi Colored Hand Tallys

Technical Data 656

ENM presents our new M24 series COLORED HAND held plastic tallys. This meter is perfect for personal counting of events or operations when you are likely to be interrupted or counting sporadically over lengthy periods. The lightweight HAND TALLY fits snugly into the palm of your hand. It's easily read figures change with a light, yet positive pressure of a thumb or finger. Up to 9999 items may be counted and can be reset at any time. This unit comes with a reset knob on the side.

This unit is great for sporting events. It can be used for counting laps while jogging, or strokes while golfing. A HAND TALLY transforms a tedious counting job into a pleasurable task. There is no need to feel apprehensive about your attention being diverted momentarily, making you forget the total. The HAND TALLY is useful at play. Let the children use it on long journeys to count any items that have a particular interest.

The HAND TALLY is also used as a row counter in knitting sewing, or craftwork. The tally is recommended by pattern manufacturers to guarantee the satisfaction of the finished garment. It has been determined that an inaccurate pattern is often the result of miscounting rows of stitches. This uncomplicated device provides the remedy.

The standard model comes with a 6" cord. 36" neck cord is also available for convenience. For desktop applications, an optional polished metal stand can facilitate ease of use.

Other colors can be ordered upon special request.

SPECIFICATIONS:

FEATURES:

- Multi-Colors Available
- Lightweight Design
