

Elapsed Time Indicator

Technical Data

Motor Driven T12 Series

T12C62B

Dependable, Low Cost Hour Meter

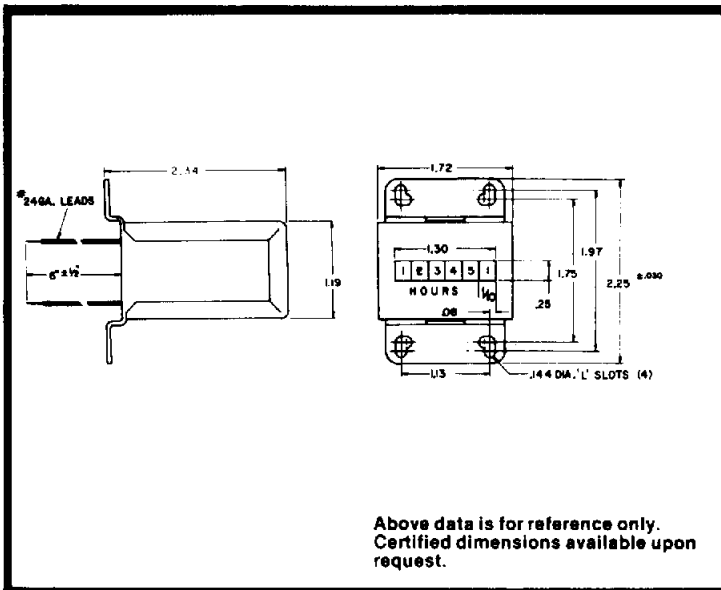

For warranty control, maintenance scheduling, process timing or establishing rental fees, ENM has put it all together for you in a small package, which is no small achievement. Here's everything you've ever wanted in an elapsed time indicator that records to 100,000 hours. Forward thinking epicyclic gearing conserves space in an easy-to-read six digit indicator, including tenths of hours, in a compact device only 1.7" wide.

The versatile CompaC T12 is interchangeable with competitive devices and may be base mounted or back panel mounted for multiple stacking in minimum space. Or add a bezel for front panel mounting.

- Compact device indicates/records to 100,000 hours
- Epicyclic step-down gearing conserves space
- Indicates tenths of hours in relief
- For back of panel, base mounting or panel mounting
- Lubricated for life
-  listed

TECHNICAL FEATURES

Time Scale:	99,999.9 hours, standard
Figures:	Hours, white on black; tenths, black on white, .140" high
Voltage:	115 V., 60 Hz., others available
Power:	1 Watt
Drive:	Synchronous motor
Reset:	None
Mounting:	Universal base, back of panel or front of panel
Dimensions:	1.7" wide x 1.2" high x 2.3" deep. Wt. 6 oz.

Above data is for reference only. Certified dimensions available upon request.

Mounting variations shown on other side.
